- Individualized quality dental care and building a lifelong relationship with you is important to us. Our professional services are rendered to you as the patient and not to your insurance company. We will do our utmost to help you derive the maximum benefits to which you are entitled. Any insurance dollar amounts or percentages discussed with you by representatives of Pine Cove Dental are ESTIMATES of your benefits only. In signing this agreement, you understand that your insurance company determines what they will pay upon receipt of your claim; there is no guarantee expressed or implied by Pine Cove Dental that any specific insurance payment amount will be paid. Therefore, you are directly responsible for 100% for all services rendered in the absence of payment from your insurance company.
- We allow up to 30 days for your insurance company to make payment. After this time, the claim will be closed and you will be responsible to pay for your balance in full. All inquiries and necessary follow up for reimbursement from your insurance become your responsibility.

VELscope®
Enhanced Oral Assessment

Oral Abnormality Screening Consent Form

We are very concerned about oral cancer and conduct screening exams on every patient.
The incidence of Oral Cancer continues to rise in the USA. The American Cancer Society indicates that since 2006, there has been a remarkable **61% increase** in this deadly disease. **Alarmingly, over 25% of the new oral cancer cases are people that do not have any of the traditional life style risk factors, such as age and tobacco and alcohol use. In fact, it is now known that the same virus that causes cervical cancer, HPV (Human Papilloma Virus), is now becoming the leading cause of oral cancer.**

Traditionally, our dentists and hygienists have done oral cancer screening with the naked eye, but recently a new technology, the **VELscope** has received FDA approval. The **VELscope** (for Visually Enhanced Lesion scope) **will help us pinpoint and identify suspicious tissue at earlier stages before they may become life threatening concerns.**

VELscope, similar to other early detection procedures like colonoscopy, mammography, PAP smear and PSA exam, is a painless, non-invasive blue light that is shined into the patient's mouth. The images are viewed through the back of the VELscope handpiece and the hygienist or dentist may find tissue abnormalities at an earlier stage. Before the exam, the room is darkened and much like "desert storm night vision technology" the clinician can see changes in tissue that may not be visible to the eye. These detected changes can range from something minor to something of greater concern that may require further examination and follow up.

The VELscope testing is an addition to our traditional visual oral cancer screening and is quick and painless, requiring only a few extra minutes. Your initial Velscope enhanced oral cancer screening exam will be at NO COST out-of-pocket to you!
If your insurance does not cover it, the annual Velscope exam is only $50 out-of-pocket should you choose to have it performed. Although it is optional, we strongly recommend that you choose this additional screening procedure.

When it comes to oral cancer, early detection is key and your health and well-being is very important to us!

Please check one:

_____ YES - I authorize the office to perform the VELscope enhanced oral cancer screening.
_____ NO - I respectfully decline the VELscope enhanced oral cancer screening, understanding and assuming any and all risks involved.
